

VINELink.com URL Integration for Agencies and Service Providers

Appriss Insights, LLC., a division of Equifax Workforce Solutions, manages VINE, the automated victim notification system in which your agency participates. VINE provides survivors, victims of crime, and other concerned citizens access to reliable information regarding changes in offender custody status.

After reviewing your agency's website, we noticed it is missing a link to www.vinelink.com, VINE's national landing page. If possible, we would like to request a VINE URL link be added to your website as a helpful resource for the constituents you serve. Doing so increases awareness of the service while providing easy access to offender, service provider, and/or court information via VINELink.com.

VINELink.com Integration

When adding <https://www.vinelink.com/> to your agency's website, it is best to include it in a location that will be easily noticed like an agency home page, resource page, inmate roster, or court case listing page.

The link on an agency's website can take the form of a graphic ad, name of the service, or a statement such as, "Click here to register for notification on changes to an offender's custody status."

We appreciate your consideration to add this link to your website and your continued support for survivors and victims of crime. Please contact your state's Client Management Team or VINE Program Manager with any questions.
