ONLINE SAFETY TOOLS FOR PARENTS

Qustodio- https://www.qustodio.com/en/

Qustodio - A parental control app that allows parents to supervise and manage their child's electronic device(s). Parents can keep track of, and limit, screen time, and they can also see what the child is accessing from their device at what time. The app can block inappropriate content, watch social media activity, track and locate calls, and set time limits for specific apps.

Kaspersky Safe Kids- https://usa.kaspersky.com/safe-kids

Kaspersky Safe Kids is an app designed to help parents monitor and control their children's digital usage. It allows for location tracking, manages screen usage time, and protects your child from exposure to inappropriate online content. As a bonus, the app also includes expert advice from psychologists that can help parents explain online security and safety to their children.

Circle, with Disney - https://meetcircle.com/

Circle allows parents a way to set guidelines around when and where children spend their online screen time. It provides a way to set time limits on individual devices and lets parents decide how and when children connect to their devices as well as filtering content. There is also a feature in which parents can review children's online time, site visits, app usage and can even tell you the current location of your children.
